1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.
